PROFESSIONAL SUMMARY

Final-year Computer Science and Engineering undergraduate (CGPA 8.5/10) with hands-on experience building full-stack web applications, multi-tenant Software as a Service (SaaS) platforms, and real-time systems using Next.js 15, React 19, Node.js, Express.js, TypeScript, PostgreSQL, and MongoDB. Completed a Frontend Development internship at the Defence Research and Development Organisation (DRDO), Ministry of Defence. Independently designed, built, and deployed 2 live full-stack products spanning B2B SaaS and financial analytics, solved 450+ Data Structures and Algorithms (DSA) problems on LeetCode, and achieved Top 3 finishes at 2 hackathons. Seeking a Software Development Engineer (SDE) role to apply strong full-stack development, low-level system design, and problem-solving skills.

CORE SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, Python, C++, SQL, HTML5, CSS3

Frontend Development: React 19, Next.js 15 (App Router), Redux, Zustand, TanStack Query, Tailwind CSS, Radix UI, ShadCN UI, GSAP, Vite

Backend and Real-Time Systems: Node.js, Express.js, REST APIs, Server Actions, WebSockets, Socket.io, WebRTC, Model-View-Controller (MVC) Architecture

Databases and Object-Relational Mapping (ORM): PostgreSQL, Neon Serverless Postgres, MongoDB, Mongoose, Prisma ORM, SQLite

Authentication and Security: Clerk Auth, NextAuth, Single Sign-On (SSO), WebAuthn and Passkeys, JSON Web Tokens (JWT), bcrypt, HMAC Signature Verification, Arcjet

Tools and Platforms: Git, Vercel, Render, Postman, Figma, Razorpay API, Inngest, Resend API, Google Gemini AI

Core Computer Science Concepts: Data Structures and Algorithms (DSA), Low-Level System Design, Object-Oriented Programming (OOP), Operating Systems, Computer Networks, Database Management Systems (DBMS)

WORK EXPERIENCE

SDE Intern, Defence Research and Development Organisation (DRDO)

June 2025 - July 2025

Scientific Analysis Group | New Delhi, India

- Designed and developed a responsive, multi-page frontend for an IEEE Document Formatter tool, including login and signup flows, file upload, and a dual-panel live editor with real-time LaTeX-compiled PDF preview
- Integrated the frontend with backend REST API endpoints to enable AI-powered content generation using Ollama Phi-3 Mini and IEEE-compliant PDF output
- Collaborated cross-functionally with a team of 3 engineers to ship production-ready UI modules meeting scientific documentation standards

PROJECTS

EchoDesk - Enterprise B2B Support Platform and Embeddable Chatbot Engine

[Live](#) | [GitHub](#)

Next.js, MongoDB, Mongoose, Scalekit, Razorpay, Google Gemini AI

- Built a multi-tenant B2B Software as a Service (SaaS) platform enabling custom chatbot deployment through a lightweight, zero-dependency client-side JavaScript widget
- Developed a server-side knowledge-ingestion engine parsing uploaded PDFs and crawling external URLs into context-aware payloads for Gemini-powered chat responses
- Integrated enterprise Single Sign-On (SSO) and passwordless WebAuth and Passkey authentication paired with Edge Middleware to enforce multi-tenant database isolation across organizations
- Secured subscription billing using the Razorpay REST API and validated incoming event payloads with SHA-256 HMAC cryptographic signature verification

FinSight - AI Financial Intelligence and Analytics Platform

[Live](#) | [GitHub](#)

Next.js 15, PostgreSQL, Neon, Prisma ORM, Inngest, NextAuth, Google Gemini AI

- Engineered a financial analytics application using Next.js 15 Server Actions, PostgreSQL on Neon, and Prisma ORM v6 with Zod schema validation on all data mutations
- Implemented secure user authentication and session management with NextAuth, protecting all financial data routes behind authenticated server actions
- Developed an automated Month-over-Month (MoM) anomaly detection engine flagging category-level spending spikes exceeding 30% relative to prior-month benchmarks
- Implemented Inngest event-driven background queues to automate monthly budget burn-rate tracking and trigger email notifications through the Resend API
- Integrated Arcjet middleware to protect financial API endpoints against bot attacks, rate-limit abuse, and malicious request patterns

ACHIEVEMENTS AND CERTIFICATIONS

- Completed DSA Supreme 3.0 [certification](#), Code Help by Love Babbar, January 2026
- Solved 450+ problems on [LeetCode](#) with strong command of arrays, trees, graphs, dynamic programming, and sliding window techniques
- Participated in 15+ hackathons with Top 5 finishes in 5+ events, including Top 3 in iQOO and Innov8 Hackathon, Top 8 at Build X: NSIT

EDUCATION

Bachelor of Technology in Computer Science and Engineering, Guru Tegh Bahadur 4th Centenary Engineering College (GGSIPU), New Delhi, India | CGPA: 8.5/10 | 2023 - 2027
